Lattice Boom Truck Crane Specifications

HM150T

Superstructure specifications

Boom 68A	General purpose, optimized for straight boom or boom and fixed jib operations, consisting of basic 50 ft. (15.2m) boom (25 ft. [7.6m] base, 25 ft. [7.6m] point). Open throat point section is equipped with six sheaves mounted on heavy duty roller bearings, offset for improved throat clearance, 22 in. (559mm) pitch diameter. Boom extensions are 10 ft. (3m), 20 ft. (6.1m) and 40 ft. (12.2m) in length. Maximum boom length is 280 ft. (85.3m). Overall boom cross section dimensions are 68 in. (1727mm) deep by 76 in. (1930mm) wide. May be fitted with optional 32A fixed jib or 4 ft. (1.2m) auxiliary sheave point.	Load Moment & Anti-Two Block System	Standard load moment and anti-two block system with audio-visual warning and control lever lockout. These systems provide electronic display of boom angle, length, radius, tip height, relative load moment, maximum permissible load, load indication and warning of impending two-block condition.
Boom 76A	More versatile, larger and heavier than 68A boom, may be fitted with 32A fixed jib or 46A luffing jib assembly. 76A basic 50 ft. (15.2m) boom consists of two piece 25 ft. (7.6m) base and 25 ft. (7.6m) point section. Boom point section is equipped with six sheaves mounted on heavy duty roller bearings, offset for improved throat clearance, 22 in. (559mm) pitch diameter. Maximum boom length is 240 ft. (73.2m). Boom extensions are 10 ft. (3m), 20 ft. (6.1m) and 40 ft. (12.2m) in length. Overall boom cross section is 76 in. (1930mm) deep by 89 in. (2261mm) wide. Wind speed monitor with audible warning.	Cab	Full vision, steel fabricated with acoustical lining and tinted safety glass throughout. Sliding left side door, sliding right side window for ventilation. Hinged skylight with electric wiper. Full engine instrumentation with fuel gauge and audio/visual warning system for all important machine functions. Fabric seat with short stroke levers at arm rest positions. Seat tilts back 10 degrees for increased high boom angle visibility.
Mast Assembly	27 ft. (8.2m) Live Mast equipped with 23 in. (584mm) pitch diameter roller bearing sheaves. Can be used as auxiliary lifting boom with standard component handling equipment, for self erection of machine counterweights, boom componentry and outrigger assemblies.	Engine	Detroit Diesel 6V-92TA, V-6, 2 cycle, turbocharged and after cooled, 552 cu. in. (9.0 liter), 345 HP (257 kw) (Gross) @ 2100 RPM, 330 HP (246 kw) (SAE NET) @ 2100 RPM.
32A Fixed Jib	Maximum length is 90 ft. (27.4m) variable in 20 ft. (6.1m) increments to basic 30 ft. (9.1m) length consisting of 15 ft. (4.6m) base and 15 ft. (4.6m) point section. This jib may be mounted on the 68A boom and the 76A boom utilizing an adaptor assembly. Jib overall cross section is 32 in. (813mm) deep by 38 in. (965mm) wide.	Optional Engine	Cummins LTA10-C325 six cylinder turbocharged and after cooled diesel, 611 cu. in. (10 liter), 325 HP (242 kw) (Gross) @ 2100 RPM. Maximum torque 975 ft. lbs. (1450 kg/m) @ 1300 RPM.
46A Luffing Jib (For 76A Boom Only)	Four piece 80 ft. (24.4m) basic jib consisting of 20 ft. (6.1m) base, two 20 ft. (6.1m) jib extensions and 20 ft. (6.1m) tip section. Maximum jib length is 160 ft. (48.8m). Cross section dimensions are 46 in. (1168mm) deep and 59 in. (1499mm) wide. Includes electronic wind speed indication.	Fuel Tank Capacity	85 gallons (322 liter)
Boom Hoist System	Hydraulic driven dual drum with standard ratchets and pawls, enclosed multi-disc wet brake spring set, hydraulically released. Drums utilize 1 in. (25.4mm) wire rope and have a pitch diameter of 23 in. (584mm). 10 part reeving standard, optional 12 part reeving necessary for 76A boom and 46A luffing jib operation. Gantry and mast utilize 23 in. (584mm) pitch diameter sheaves with anti-friction bearings. Automatic boom hoist kickout at 81 degrees.	Swing	Ball bearing swing circle with 360° continuous rotation. Planetary glide swing with static holding multi-disc wet brake actuated with brake hold button on control lever and/or switch operated parking brake. Rotation is stopped by back plugging swing controller. Plunger type, 2 position, mechanical house lock. Maximum speed: 2.5 rpm.
		Counterweights	Two piece totaling 59,000 lbs. (26762 kg). Counterweight "A" equals 17,500 lbs. (7938 kg), and counterweight "C" equals 41,500 lbs. (18825 kg). Counterweights hook on for quick and easy handling.

Superstructure specifications (continued)

HYDRAULIC SYSTEM

Pumps	Four main pumps, one for each function: front hoist, rear hoist, boom hoist, and swing. All main pumps are variable displacement axial piston type. Pumps driven by common gearbox with disconnect clutch.
Controls	Short stroke low pressure hydraulic controllers stroke pumps to determine direction and speed of each function.
Filtration	100% 7 micron filtration of charge and control pressure circuits.
Reservoir	75 gallon (284 liter) capacity with internal diffusers and magnets. Electric fill pump with spin-on filter cartridge provided.
Oil Cooler	Remote mounted with thermostatically controlled hydraulic motor powered fan. High oil temperature warning light provided in operator's cab.

HOIST SPECIFICATIONS

	Power up and down 2 speed operation standard with ratchet and pawl. Semi-automatic hoist brake feature with free fall to 10,000 lbs. (4535 kg) capacity on foot operated caliper brake pedals. Electronic hoist drum rotation indicators.
MAKE/MODEL	Front and Rear Hoists Grove H060-29
Drum Dimensions	21 in. (533mm) diameter 29 in. (737mm) length 35 in. (889mm) flange diameter

Line Pull and Line Speed Combinations (4th Layer)

Based on Maximum Permissible Single Line Pull of 29,500 lbs. (13,381 kg) for 1 in. (25.4mm) diameter wire rope - main hoist drums only.

Single Line Pull		Low Speed Mode	
Pounds	Kilograms	FPM	Speed m/min.
29,500	13381	185	56.4
25,000	11340	220	67.1
20,000	9072	240	73.1
15,000	6804	250	76.2
10,000	4536	255	77.7
5,000	2268	260	79.2
1,000	454	260	79.2

Single Line Pull		High Speed Mode	
Pounds	Kilograms	FPM	Speed m/min.
15,000	6804	320	97.5
12,500	5670	390	118.9
10,000	4536	455	138.7
7,500	3402	485	147.8
5,000	2268	500	152.4
2,500	1134	515	157.0
1,000	454	520	158.5

Maximum Permissible

Line Pull Based On

1 in. dia. (25.4mm) 6 x 25 w/3.5:1 F.O.S.
29,500 lbs. (13381 kg)
1 in. dia. (25.4mm) 18 x 19 w/5:1 F.O.S.
22,760 lbs. (10324 kg)
25 mm (0.984 in.) 34 x 7 w/5:1 F.O.S.
27,170 lbs. (12325 kg)

Rope Stowage

Usable - 1,190 ft. (363m)
Stowable - 1,440 ft. (439m)

Third Hoist

Luffing jib hoist, power up and down, 2 speed operation standard with ratchet and pawl, enclosed multi-disc wet brake, spring set hydraulically released. Drum utilizes 3/4 in. (19mm) dia. wire rope. Stowable capacity - 790 ft. (241m). Recommended length - 680 ft. (207m), required for luffing jib.

*Denotes optional equipment.

Carrier specifications

Frame	High strength alloy steel, triple box rear section and channel front section, all welded, with machined surface for turntable bearing.	Transmission	Fuller gearbox with 9 speeds forward and 2 reverse, with 2 speed auxiliary.
Bumper Counterweight	Counterweight "L", one piece - 12,000 lbs. (5443 kg). Pin connected to front of carrier, power removed and installed with mast component handling equipment. (Refer to capacity chart for counterweight requirements).	Axles	Axles 1 & 2, steering, tubular steel, 115.4 in. (2931mm) track. Axles 3 & 4, single reduction drive, 100 in. (2540mm) track.
HYDRAULIC SYSTEM		Suspension	Front axles (1 & 2) spring mounted tandem. *Optional hydraulic spring suspension lockout system. Rear axles (3 & 4) solid mount tandem with equalizing beam and solid steel saddles.
Pump	Single vane type pump driven by carrier engine provides flow to the steer and outrigger circuits.	Tires	14.00x24-20PR highway tread, tube type-front and rear. *14.00R24-20PR radial, tube type - front and rear. *16.00R21-22PR radial, tubeless type - front only.
Filter	Return line type, full flow with bypass protection and filter bypass indicator, replaceable 25 micron cartridge, remote mounted.	Brakes	Full air on all wheels. Air dryer provided to preclude moisture accumulation. Spring set, air released emergency/parking brake on both rear axles.
Reservoir	35 gallon (132.5 liters) capacity with spin on breather, external sight gauges, clean out access, internal diffusers and magnet.	Lights	Full lighting including head, tail, braking, reversing, directional and hazard warning lights.
Outrigger System	Hydraulic single stage double box telescopic beam and jack outriggers with integral holding valves. Removable, pinned to carrier frame. Mid frame box equipped with tilting jack and suspended on integral rail, allowing box to roll out from under frame. Standard 5th vertical jack mounted to the front center section to permit 360° lifting capacities. *Optional mechanical outrigger spin locks, for main jacks only. *Optional rear stabilizing jacks, for erecting certain boom lengths (Refer to capacity charts for rear stabilizer requirements). All steel fabricated quick release type outrigger floats 30.5" (775mm) diameter for main jacks, 24" (610mm) diameter for front jack and rear stabilizers.	Cab	One man design, all steel fabricated with acoustical lining and tinted safety glass throughout. Deluxe fabric covered fully adjustable seat. Complete driving controls with full engine instrumentation, low air A/V warning system, air circulating fan, heater, defroster, windshield washer/wiper, sliding right side window, roll up left side window, fire extinguisher and seat belt.
Outrigger Controls	Located on both sides of carrier. Controls provided for beam and jack extension/retraction as well as engine speed.		
Engine	Detroit Diesel 6V-92TA, V6, 2 cycle, turbocharged and after cooled, 552 cu. in. (9.0 liter), 335 HP (250 kw) (Gross) @ 2100 RPM, 304 HP (227 kw) (SAE NET) @ 2100 RPM.		
*Optional Engine	Cummins N14-460E, six cylinder turbocharged and after cooled diesel. 855 cu. in. (14 liter), 460 HP (343 kw) @ 1600 RPM, 350 HP (261 kw) @ 2100 RPM Maximum torque 1550 ft. lbs. (2102 kg/m) @ 1200 RPM with engine brake and audio-visual engine distress system.		
Fuel Tank Capacity	100 gallons (379 liters).		
Electrical	Four 12 volt - maintenance free batteries, 750 CCA @ 0 degrees F. 24 volt starting, 90 amp alternator.		
Drive	8 x 4		
Steering	Front axle steering, gear type with hydraulic assist.		

Carrier specifications (continued)

SPEED AND GRADEABILITY 90,000 LBS. (40824 kg) GVW

SPEED RANGES AT MAXIMUM GOVERNED RPM		% GRADEABILITY AT MAXIMUM TORQUE	
AUXILIARY LOW	AUXILIARY DIRECT	AUXILIARY LOW	AUXILIARY DIRECT
1.8 to 23.2 mph (2.9 to 37.3 kph)	3.7 to 48 mph (6.0 to 77.2 kph)	72.3 to 4.3%	34.7 to 1.3%

NOTE: Performance data based on 90,000 lbs. (40824 kg) GVW, standard engine, transmission, axles and 14:00x24-20PR tires. Performance data may vary \pm 10% due to variations in engine performance and vehicle weights.

Miscellaneous Standard Equipment	Tire inflation kit, mud flaps, pressure protected air system, outrigger controls (on both sides of carrier) outrigger pad storage, cold start aid (less canister), engine distress A/V warning system, air cleaner service indicator, air dryer, air horn, front tow loops, west coast mirrors (both sides), pump disconnect, hoist drum rotation indicators and back up alarm.
---	---

Miscellaneous Optional Equipment	Jacobs engine brake, cold weather package, front suspension lockout, hydraulic powered foot pins, auxiliary rear stabilizers, mechanical outrigger spinlocks, rigging box, 360° swing lock, rotating beacon, boom mounted floodlights, extendible work platforms (both sides of superstructure), component handling assembly and third hoist.
---	---

*Denotes optional equipment.

LOAD CHARTS

**FOR 76A BOOM (76 X 89)
& 32A JIB (32 X 38)
OR
46A (46 X 59)**

**85% Stability - On Outriggers
75% Stability - On Rubber**

"WARNING: THIS CHART IS ONLY A GUIDE. The Notes inside are for illustration only and should not be relied upon to operate the crane. The individual crane's load chart, operating instructions and other instruction plates must be read and understood prior to operating the crane."

NOTES TO LIFTING CAPACITIES

GENERAL:

1. Rated loads as shown on capacity chart pertain to this crane as originally manufactured and equipped. Modifications to the crane or use of optional equipment other than that specified can result in a reduction of capacity. Use only the jib or boom extension supplied with this crane. Do not substitute jibs or boom extensions without the written approval of Grove Manufacturing Co.
2. Construction equipment can be hazardous if improperly operated or maintained. Operation and maintenance shall be in compliance with the information in the Operator's and Safety Handbook. Service, Parts, and Roding/Rigging manuals supplied with this crane. If these manuals are missing, order replacements from the manufacturer.
3. The operator and other personnel associated with this crane shall fully acquaint themselves with the latest applicable American National Standards Institute (ANSI) Safety Standards for cranes.
4. **WARNING!** Do not attempt to operate this crane unless you have read and are thoroughly familiar with the Operator's and Safety Handbook, and Roding/Rigging manuals.

SETUP:

1. The crane shall be leveled on a firm supporting surface. Depending on the nature of the supporting surface, it may be necessary to have structural supports of sufficient strength under the outrigger floats or tires to spread the load to a larger bearing surface.
2. For outrigger operation, outriggers shall be fully extended to 22 ft. 0 in. (6.7 m) width with tires raised free of crane weight before operating boom or lifting loads.
3. The front jack cylinder shall be set in accordance with the written procedure. See Carrier Operator's Safety Handbook Section 4.
4. With certain boom and hoist tackle combinations, maximum capacities may not be obtainable with standard cable lengths.
5. Rotation resistant wire rope is best suited for single line lifting operations. Consult the wire rope manufacturer for specific recommendations concerning multiple part reeving.
6. Consult the Roding and Rigging Manual for the proper boom-counterweight configuration for jobsite moves.
7. **WARNING!** Never raise boom from ground, operate boom, or rotate upperstructure without consulting Roding and Rigging manual to assure machine is in proper operating configuration. That is outriggers extended and set, or front axle lockouts engaged, and proper counterweights installed.
8. When lowering boom over rear, caution must be taken to assure boom does not contact carrier deck or rear outrigger. Blocking may be required under boom point.
9. **WARNING:** Never erect jibs unless outriggers are fully extended to 22 ft. 0 in. (6.7 m) and set.
10. **WARNING:** When erecting booms longer than 190 ft. (57.9 m) for 68A boom or 220 ft. (67.1 m) for 76A boom, Mid Point Suspension must be installed. Consult Roding/Rigging manual for proper location of mid point suspension.

OPERATION:

1. Rated loads at rated radius shall not be exceeded. Do not tip the machine to determine allowable loads. For clamshell and concrete bucket operation, see respective load charts.
2. All rated loads have been tested to and meet minimum requirements of SAE J-987 Crane Structures - Method of Test, and do not exceed the percentage of the tipping load shown on capacity charts as determined by SAE J-765, Crane Stability Test Code.
3. Rated loads include the weight of hook block, slings and auxiliary lifting devices and their combined weights shall be subtracted from the listed ratings to obtain the net load which may be lifted.
4. Load ratings are based on freely suspended loads. No attempt shall be made to move a load horizontally on the ground in any direction.
5. Rated loads do not account for wind on lifted load or boom. It is recommended when wind velocity is above 20 mph (32 km/h), rated loads and boom lengths be appropriately reduced.
6. Rated loads are for lift crane service only.
7. Do not operate at a radius or boom length where capacities are not listed. At these positions, the crane may over turn without any load on the hook.
8. When either boom length or radius or both are between values listed, the smallest load shown at either the next larger radius or boom length shall be used.
9. For safe operation, the user shall make due allowances for his particular job conditions, such as soft or uneven ground, high winds, pendulum action, jerking or sudden stopping of loads, hazardous conditions, experience of personnel, two machine lifts, traveling with loads, electric wires, etc. Side pull on boom or jib is extremely dangerous.
10. Handling of personnel from the boom is strictly prohibited.
11. Keep load handling devices a minimum of 18 in. (45.7 cm) below head at all times.
12. The boom angle before loading should be greater than the loaded boom angle to account for deflection.
13. Capacities appearing above the bold line or within shaded areas are based on structural strength and tipping should not be relied upon as a capacity limitation.
14. Radii less than 40 ft. (12 m) not recommended when lifting over the front of machine.

DEFINITIONS:

1. Operating Radius: Horizontal distance from a projection of the axis of rotation to the supporting surface before loading to the center of the vertical hoist line or tackle with load applied.
2. Loaded Boom Angle: Is the angle between the boom base section and the horizontal after lifting the rated load at the rated radius with the rated boom length.
3. Working Area: Areas measured in a circular arc about the centerline of rotation as shown on the working area diagram.
4. Freely Suspended Load: Load hanging free with no direct external force applied except by the lift cable.
5. Side Load: Horizontal force applied to the lifted load either on the ground or in the air.
6. No Load Stability Limit: The stability limit radius shown on the range diagram is the radius beyond which it is not permitted to position the boom plus block configuration, because machine can overturn without any load on the hook.

LIFTING CAPACITY NOTES
STABILITY - 85% ON OUTRIGGERS - 75% ON TIRES
76A BOOM (76"x89")

GENERAL NOTES FOR BOOM CAPACITY:

1. Rated loads appearing in shaded areas are based on structural strength or other factors and tipping should not be relied upon as a capacity limitation.
2. Rated loads are in pounds and do not exceed 85% of tipping loads on outriggers and 75% of tipping loads on tires as determined by test in accordance with SAE J765 OCT80.
3. Rated loads are applicable only with machine on a firm level surface.

FOR MACHINE ON OUTRIGGERS:

4. Rated loads are applicable only with outriggers fully extended and set with all tires clear of ground.
5. For 360° operation the front jack cylinder must be set in accordance with written procedure. See "Carrier Operator's and Safety Handbook, Section 4".
6. CAUTION: The maximum boom length that can be erected with no counterweight is 110 ft. over side and 120 ft. over rear. Boom lengths longer than those listed below for the specified upper counterweight require 'L' bumper counterweight and/or rear auxiliary stabilizers for erection over rear. Consult "Roading and Rigging Manual" for additional erection information. When the 'L' counterweight is required for erection, it should remain installed on the machine during operation. Refer also to the load chart being used for proper counterweight configuration.

Upper Counterweight	Over Side	Over Rear		
		'L' Counterweight or Auxiliary Stabilizers Boom Length	'L' Counterweight and Auxiliary Stabilizers Boom Length	'L' Counterweight and Auxiliary Stabilizers Maximum Allowable Boom
A	130 ft.	140 ft.	170 ft.	190 ft.
A+C	190 ft.	190 ft.	210 ft.	240 ft.

Auxiliary stabilizers are to be used for erection only and not to increase capacity. With auxiliary stabilizers in place and set, tipping should not be relied upon as a capacity limitation over the rear.

FOR MACHINE ON TIRES (STATIONARY):

4. Rated loads are applicable to machine equipped with 14:00 x 24 (20 ply) bias ply tires at 115 psi cold inflation pressure or radial ply tires at 120 psi cold inflation pressure or 16:00 x 21 (22 ply) radial ply tires at 85 psi cold inflation pressure.
5. All lifting depends on proper tire inflation, capacity, and condition. Rated loads must be reduced for lower tire inflation pressures. Damaged tires are hazardous to safe operation of crane.
6. Rated loads are for a stationary machine. Do not travel with loads.
7. Front axles must be locked on both axles before lifting on tires over side or front.
8. CAUTION: Boom lengths longer than those listed below for the specified upper counterweights require lowering of the outriggers for erection.

Upper Counterweight	Erection Over Side	Erection Over Rear	Erection (Requires Outriggers) Maximum Allowable Boom Length
None	50 ft.	70 ft.	110 ft.
A	70 ft.	90 ft.	130 ft.
A+L	Not Allowed	110 ft.	130 ft.

FOR MACHINE ON TIRES (PICK & CARRY):

4. Rated loads are applicable to machine equipped with 14:00 x 24 (20 ply) bias ply or radial tires at 100 psi cold inflation pressure or 16:00 x 21 (22 ply) radial ply tires at 85 psi cold inflation pressure.
5. All lifting depends on proper tire inflation, capacity and condition. Rated loads must be reduced for lower tire inflation pressures. Damaged tires are hazardous to safe operation of crane.

6. For pick and carry operation, boom must be centered over rear of machine, mechanical swing lock engaged, and load restrained from swinging. When handling loads in the structural range with capacities close to maximum rating, travel should be reduced to creep speeds.

7. Creep - not over 200 ft. (61 m) of movement in any 30 minute period and not exceeding 1 mph (1.6 kph).

MACHINE ON OUTRIGGERS EQUIPPED WITH A JIB:

1. Rated loads appearing in jib chart in shaded areas are based on factors other than those which would cause a tipping condition and are the maximum allowable under ideal job conditions. Tipping should not be relied upon as a capacity limitation.
2. Rated loads are shown in pounds and do not exceed 85% of tipping loads a determined by test in accordance with SAE J765 OCT80.
3. Rated loads are applicable only with machine on a firm level surface.
4. Rated loads are applicable only with outriggers fully extended and set with all tires clear of ground.
5. For 360 degree operation the front jack cylinder must be set in accordance with written procedure. See "Carrier Operator's and Safety Handbook, Section 4".

32A JIB (32"x38")

6. CAUTION: Boom-jib combinations longer than those listed below require 'L' bumper counterweight and/or auxiliary stabilizers for erection over rear. Consult "Roading and Rigging Manual" for additional erection information. When the 'L' counterweight is required for erection, it should remain installed on the machine during operation.

Upper Counterweight	Over Side BOOM + JIB Length (ft.)	Over Rear		
		'L' Counterweight or Auxiliary Stabilizers BOOM + JIB Length (ft.)	'L' Counterweight and Auxiliary Stabilizers BOOM + JIB Length (ft.)	'L' Counterweight and Auxiliary Stabilizers Maximum Allowable BOOM + JIB Length (ft.)
A+C	160 + 30	170 + 30	190 + 30	210 + 30
A+C	160 + 50	160 + 50	180 + 50	210 + 50
A+C	150 + 70	160 + 70	170 + 70	200 + 70
A+C	140 + 90	150 + 90	170 + 90	190 + 90

Auxiliary stabilizers are to be used for erection only and do not increase capacity. With auxiliary stabilizers in place and set, tipping should not be relied upon as a capacity limitation over the rear.

46A JIB (46"x59")*

6. CAUTION: Maximum allowable BOOM + JIB for erection. Consult "Roading and Rigging Manual" for additional erection information.

Upper Counterweight	Over Side		Over Rear			
	'L' Counterweight BOOM + JIB Length (ft.)	Min. Boom * Angle for Erection	'L' Counterweight BOOM + JIB Length (ft.)	Min. Boom * Angle for Erection	'L' Counterweight and Auxiliary Stabilizers BOOM + JIB Length (ft.)	Min. Boom * Angle for Erection
A+C	120 + 80	35°	140 + 80	35°	170 + 80	36°
A+C	140 + 100	45°	140 + 100	40°	170 + 100	40°
A+C	140 + 120	50°	140 + 120	50°	170 + 120	44°
A+C	140 + 140	60°	140 + 140	55°	170 + 140	50°
A+C			140 + 160	60°	170 + 160	54°

*WARNING! Jib point must be allowed to roll on the ground until vertical when folded under boom or within 15° of vertical when extended beyond boom before picking jib point from ground. When minimum boom angle for erection is greater than boom angle that jib point leaves ground, boom must be elevated to minimum angle for erection before erecting jib.

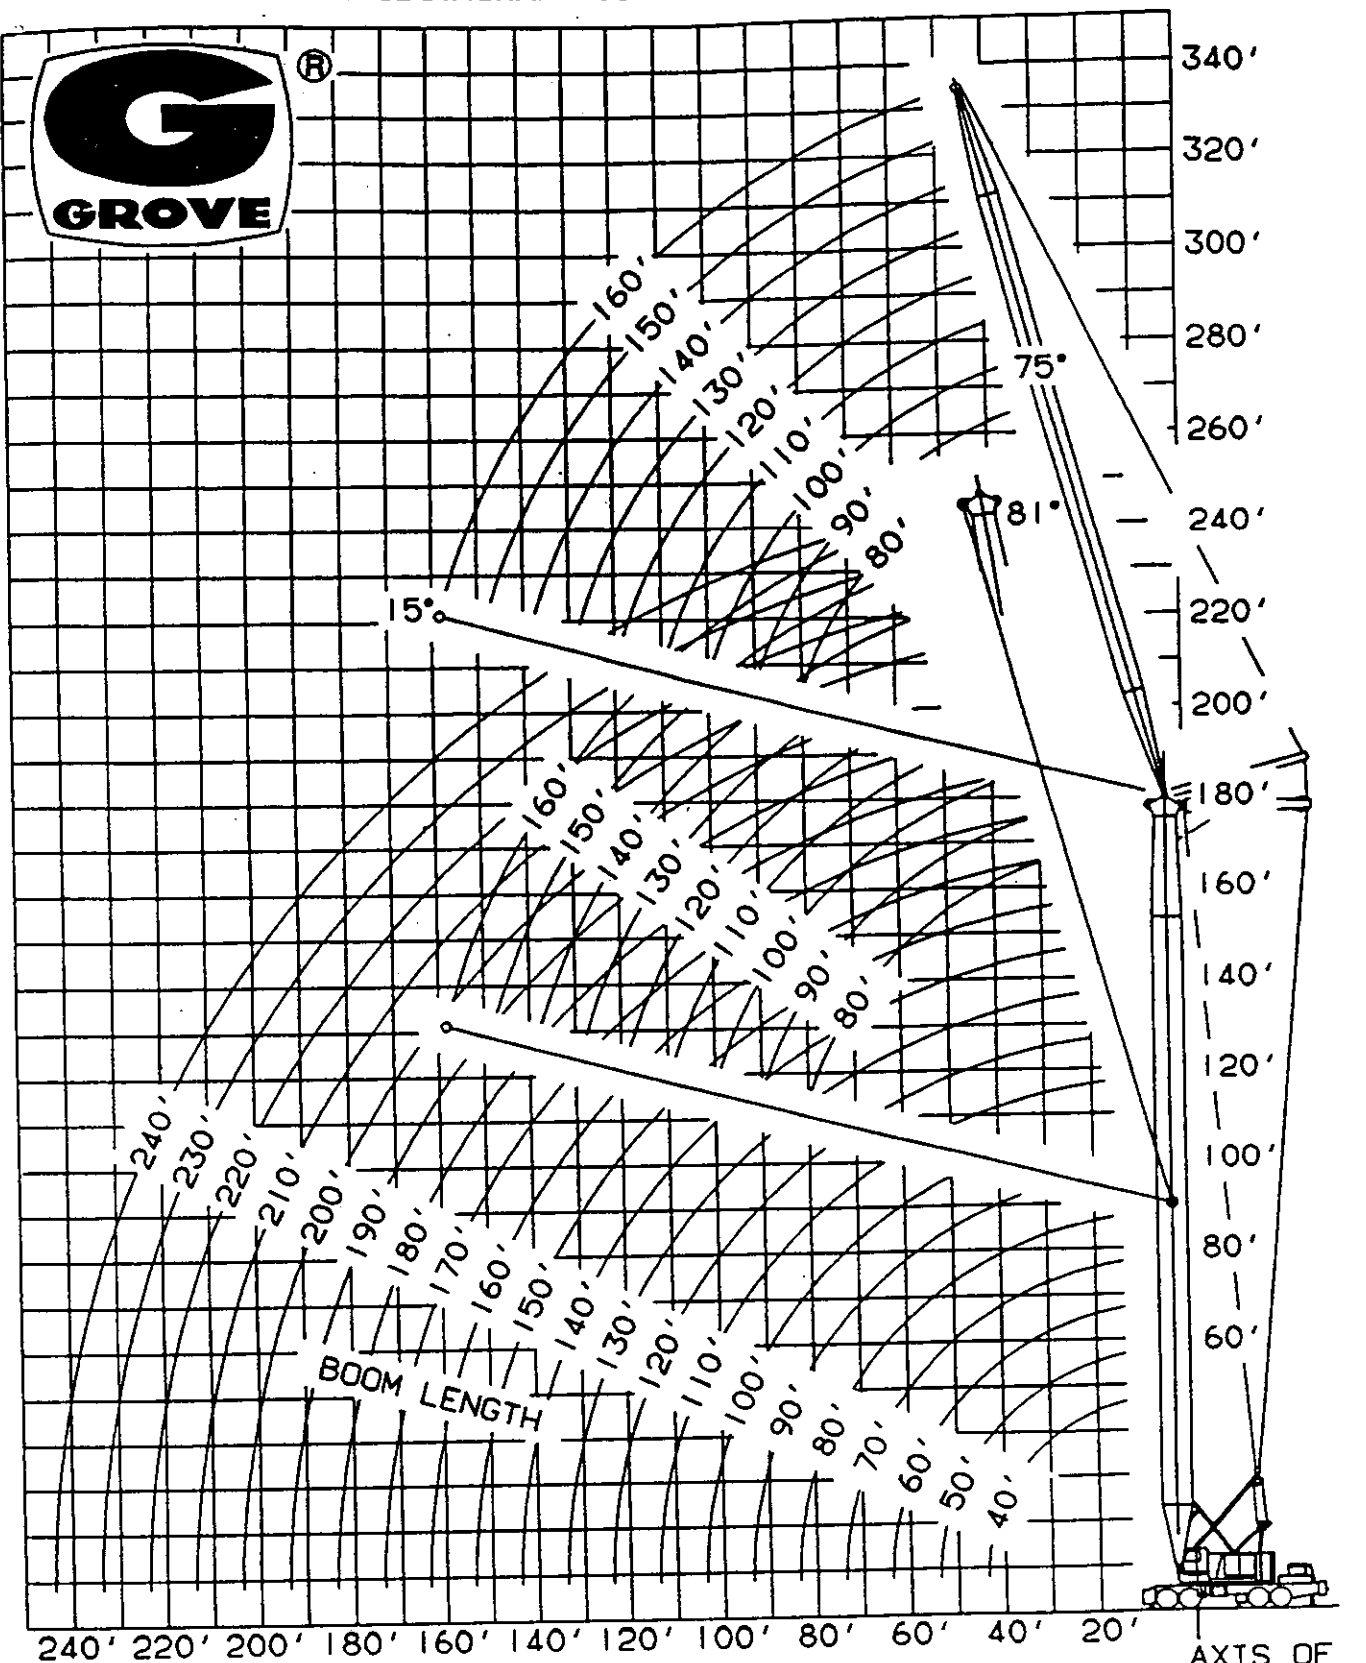

7. For 46A JIB, jib length must be a minimum of 10 ft. shorter than boom length to fold the jib under the boom.
8. 46A JIB CAUTION! Do not operate jib above 75° when boom is vertical as jib may be overhauled by jib suspension.

30	13.2	8,700	12,000	17,500

1. Rated loads appearing in shaded areas are based on structural strength and tipping should not be relied upon as a capacity limitation.
2. Rated loads are in pounds and do not exceed 85% of tipping loads on outriggers and 75% of tipping loads on tires as determined by test in accordance with SAE J-765 OCT80.
3. On tire rated loads are for the machine with outrigger boxes removed.
4. Rated loads are applicable to machines equipped with 14.00 x 24 (20 ply) bias ply or radial tires at 115 psi cold inflation pressure or 16.00 x 21 (22 ply) radial ply tires at 85 psi cold inflation pressure.
5. All lifting depends on proper tire inflation, capacity and condition. Rated loads must be reduced for lower tire inflation pressures. Damaged tires are hazardous to safe operation of crane.
6. Rated loads are applicable only with machine on a firm level surface.
7. Front axles must be locked on both axles before lifting on tires over side or front.
8. Gantry must be pinned in high position before lifting loads.
9. Use of the heaviest hookblock allowable within load chart limits also works best to prevent overhauling.

- Rated loads appearing in shaded areas are based on structural strength and tipping should not be relied upon as a capacity limitation.
- Rated loads are in pounds and do not exceed 85% of tipping loads on outriggers and 75% of tipping loads on tires as determined by test in accordance with SAE J-765 OCT80.
- On tire rated loads are for the machine with outrigger boxes removed.
- Rated loads are applicable to machines equipped with 14.00 x 24 (20 ply) bias ply or radial tires at 115 psi cold inflation pressure or 16.00 x 21 (22 ply) radial ply tires at 85 psi cold inflation pressure.
- All lifting depends on proper tire inflation, capacity and condition. Rated loads must be reduced for lower tire inflation pressures. Damaged tires are hazardous to safe operation of crane.
- Rated loads are applicable only with machine on a firm level surface.
- Rated loads are for a stationary machine. Do not travel with loads.
- Front axles must be locked on both axles before lifting on tires over side or front.
- Gantry must be pinned in high position before lifting loads.
- Additional boom extension must be added to the boom base section to prevent the mast from overhauling the boom at maximum boom angle (minimum radius). Use of the heaviest hookblock allowable within load chart limits also works best to prevent overhauling. To facilitate boom buildup, the length of extensions to be used for service erection depend on the completed boom configuration and length.
Refer to the following chart to determine proper boom sections to use for service erection. The boom length that is required after completion of the erecting procedure is found in the left column (final length of boom). The extensions to be used are noted in the right column (extension required). The total boom length used for service erection must never be longer than 70 ft. for complete boom and 85 ft. for extensions.

Final Length of Boom (in feet)	Extensions Required
50 thru 70	Complete Boom
80, 120, 160	10 ft. Ext. + 20 ft. Ext.
90, 130, 170, 200 thru 240	40 ft. Ext.
100, 140, 180	10 ft. Ext. + 40 ft. Ext.
110, 150, 190	20 ft. Ext. + 40 ft. Ext.
